Biographical / Historical

David Eugene Smith (January 21, 1860 – July 29, 1944): Mathematician. Professor of mathematics at the State Normal School, Cortland, N.Y., 1884-1891; at Michigan State Normal College, 1891-1898; at New York State Normal School, Brockport, N.Y., 1898-1901; and at Teachers College, Columbia University, 1901-1944. He was the editor of the Bulletin of the American Mathematical Society, the American Mathematical Monthly, and Scripta Mathematica, a member of the International Commission on the Teaching of Mathematics, 1908-1944; and librarian of Teachers College, 1902-1920. He was the author of Rara Mathematica (1907), The History of Mathematics (1924), and many other works on the history of mathematics as well as over forty mathematical textbooks and numerous journal articles. He also collected manuscript materials relating to the history of mathematics.

David Eugene Smith was born in January 1860 at Cortland, New York. He received his early education in Cortland and then went on to Syracuse University. From 1881-1884 he practiced law at Cortland before taking up the teaching of mathematics at the State Normal School in Cortland, 1885-1891. For seven years, thereafter, he was professor of mathematics at the Michigan State Normal College, Ypsilanti. After that he served three years as principal of the New York State Normal School at Brockport. In 1901 he was appointed professor of mathematics at Teachers College, Columbia University, where he taught until his retirement in 1926.

Not long after coming to Columbia, he started his annual trips abroad to collect items for his library. Over the years, he crossed the Atlantic seventy-four times and visited almost every country in the world. Besides printed and manuscript books, he collected documents, autograph letters, portraits of mathematicians, medals, counters, and a variety of mathematical and astronomical instruments.

His first trip to Japan was in 1907 and his intentions are made clear in one of his dictated notes as recorded in a memorial publication by Lao G. Simons: "In Japan, I simply laid down the rule that I wanted to buy every mathematical manuscript or printed book that could be found." With the collaboration of Mikami Yoshio, a distinguished scholar of Japanese and Chinese mathematics, he wrote *A History of Japanese Mathematics*, which was published in 1914.

In 1931 he gave Columbia University his library, which in a 1940 inventory numbered some 20,300 items. After fifty-five years of dormant presence, the Japanese language materials have finally been cataloged, thus making them accessible to scholars and students. The major portion of the Japanese materials is on Japanese mathematics with a number of titles in the related fields of the abacus, surveying, astronomy, and calendar-making. Works touching on a few other subjects make up the balance.

David Eugene Smith died at his home in New York on July 29, 1944 at the age of 84.

Biographical / Historical

George Arthur Plimpton (July 13, 1855-July 1, 1936): publisher and collector, college trustee and philanthropist. Phillips Exeter Academy, 1873; Amherst College, 1876. After a year at Harvard Law School, he began as salesman in the educational publishing house of Ginn and Heath, becoming a member of the firm in 1882. In 1914, he became head of the firm, renamed Ginn and Company, was active in it until 1931, and remained a member until his death on July 1, 1936.

佛言世間有人。好自稱譽皆是貢高。當墮三惡道中後還為人作牛馬奴婢生下賤中人。當乘其力負重而行。困苦疲極亡失人身。聞我說是藥師琉璃光佛如來本願功德者。皆當一心歡喜踊躍更作謙敬。即得解脫眾苦之患。長得歡樂聰明智慧。遠離惡道得生善處。與善知識共相值遇。無復憂惱離諸魔縛長得安隱。佛言世間愚癡人輩。兩舌鬪諍惡口罵詈更相嫌恨。或就山神樹下鬼神。日月之神南斗北辰諸鬼神。所作諸呪誓。或作人名字或作人形像。

Goyuigo = 御遺告, circa 1700

Scope and Contents

D.E.S. Note: "Scroll written about 1700. Buddhistic teachings of the great priest-teacher Kobo dai shi [Kobo the great teacher]. Purchased at Kyoto, 1930."

This text is the teachings that Kukai (774-835; posthumously known as Kobo Daishi) provided for his disciples on the fifteenth day of the third month of Jowa 2 (835), 6 days before his death, which is called "Goyuigo" (the Last Words).

In the Goyuigo, he anticipated that he would soon die and he gave detailed directions on the management and operation of the temples of the Shingon or "True Word" school of Buddhism. The Shingon School has handed it down as an important canon.
