Abstract:	The American architectural firm Greene & Greene was a partnership between the brothers Charles Sumner Greene (1868-1957) and Henry Mather Greene (1870-1954). The firm, established in 1894, was officially dissolved in 1922, after which the two practiced independently. They were active in Southern California and were part of the American Arts and Crafts Movement. During the years 1907-1909 the Greenes created some of their most renowned residences, including the Blacker, Gamble, Pratt, and Thorsen houses. They also designed interiors, creating furniture, lighting, carpets, and stained glass for their clients. Greene & Greene architectural drawings and records spans the years circa 1896 to circa 1963. The collection chiefly consists of architectural drawings (approximately 4,800) and also includes photographs, personal papers, and other manuscript material. Access to digital images of all the architectural drawings and to selected photographs are provided in the finding aid.

Series I: Architectural Drawings

Scope and Contents

This series contains approximately 4,800 architectural drawings for over 240 Greene & Greene projects. Drawings are arranged alphabetically using client surname for private houses and project name for corporate and public clients.

Each project was catalogued separately in the online catalog. This finding aid provides a link to each project's associated record. Sheet level description can be found in these project-level records. Each sheet is individually accessioned with numbers ranging from NYDA.1960.001.00001 through .04764.

The drawings in this collection were digitized as part of the Greene & Greene Virtual Archives (GGVA) project. The GGVA is made possible by a generous grant from the J. Paul Getty Trust under the Electronic Cataloguing Initiative of the Getty Grant Program. With the objective of creating a single visual resource for Greene & Greene researchers, homeowners, students, and the general public, the GGVA brings together selected material from the four major Greene & Greene collections: the Avery Architectural and Fine Arts Library; the Environmental Design Archives at the University of California, Berkeley (UCB); The Gamble House, University of Southern California (USC), in Pasadena, California; and the Greene & Greene Archives, USC at The Huntington Library Art Collections and Botanical Gardens in San Marino, California. Access to digital images of the architectural drawings from Avery's collection is provided in this finding aid.

Series II: Project Photographs

Scope and Contents

This series contains approximately 527 photographs for 23 Greene & Greene projects. Photographs are arranged alphabetically using client surname for private houses and project name for corporate and public clients.

Each project was catalogued separately in the online catalog. This finding aid provides a link to each project's associated record. Item level description can be found in these project-level records. Each photograph is individually accessioned with numbers ranging from Range: NYDA.1987.003.00001 through .00527.

A selection of photographs in this collection were digitized as part of the Greene & Greene Virtual Archives (GGVA) project. Access to these digital images is provided in this finding aid.

Series IV: Jean Murray Bangs' Research Files on Greene & Greene

Scope and Contents

The series consists of the research papers of architectural historian Jean Murrary Bangs (1894-1985). Bangs was a Berkeley-trained economist who became an architectural historian of the United States Modern movement. In the 1940s, she focused her work on the rediscovery of Charles and Henry Greene's work in Southern California. Her research on Greene & Greene was published in Architectural Forum (Oct. 1948). A planned book on the firm was never completed. The series includes blueprints found by Bangs in the garage of one of the Greene brother's former home.
