<b>Abstract:</b>	Alfred Neumann (1900-1968) was a Czech architect with an international career. Most of his major projects were executed in Israel; his earlier work consisted mainly of private residences for Czech clients, as well as commercial and residential architecture undertaken with various firms or government bodies in Paris, Berlin, Algiers, and South Africa. Neumann devoted a substantial portion of his career to teaching and to research into architectural morphology, theories of proportion, polyhedral structures, and architectural space as pattern. He taught at both the Technion (Israel Institute of Technology) in Haifa, and the Université Laval in Quebec. He participated in CIAM (Congrès International d'Architecture Moderne), Groupe Espace, and other architectural groups throughout his career. This collection consists mainly of project drawings and photographs, personal and professional correspondence, Neumann's writings and research, papers related to Neumann's membership in CIAM, and publications related to his projects. The bulk of the material dates from Neumann's later career and concerns projects and research undertaken while Neumann was in Israel.

## Biography

---

Alfred Neumann was born in Vienna on January 26th, 1900 to Hermine Hinkl and Sigmund Neumann, a furniture maker. They moved to Brünn (now Brno) in the 1910's, where Neumann attended the Deutsche Technische Hochschule from 1919 to 1922 (there he received some training in the fine arts as well as architecture). He subsequently attended the Meisterschule für Architektur at the Akademie der bildenden Künste in Vienna (1922-1925), where he studied under Peter Behrens and was awarded the Behrens Preis in 1924. Upon completion of his studies in Vienna, Neumann moved to Paris where he studied under Auguste Perret at the Atelier du Palais de Bois (1926-1932). During the 1920's, Neumann also worked for French architect Charles Siclis (1925) and for Peter Behrens in Berlin (1927) (projects during this period include cinemas, metro stations, department stores, and housing). Neumann was additionally employed in Paris by Ali Tur, architect of the Ministère des Colonies, under whom he worked on Parisian housing developments and the reconstruction of Guadeloupe after a 1928 hurricane. Later that year Neumann traveled to Barcelona to study the work of Antoni Gaudí.

## Biography

---

In 1928 and 1929, Neumann worked in Algiers for the architect Jacques Guiauchain on projects for the Bureaux Administratifs du Palais du Gouvernement and other civic and municipal projects. In the early 1930's, Neumann worked in the offices of various architects in Paris, including Pierre Forestier, Jean Ginsberg, Denis Honegger, Berthold Lubetkin, Auguste Perret, Georges-Henri Pingusson, and Maurice Rotival (projects of this period include housing, schools, and recreation facilities). During the 1930's, Neumann was a member of the Parisian artists' groups Cercle et Carré and Abstraction-Création, avant-garde groups which promoted abstraction in the arts.

## Biography

---

Between 1934 and 1936 Neumann worked for the architectural firm of Kallenbach, Kennedy, and Furner in Johannesburg and Cape Town, South Africa, on residential and commercial projects. After a brief period in Paris, Neumann returned to Brno and practiced independently, producing mainly residential buildings, interior designs, and furniture designs for private clients. In February of 1945, Neumann was deported from Prague to the concentration camp Terezín (Theresienstadt); he was freed in May of that year. After the war, Neumann worked for the Country Research and Planning Institute in Brno (1945-1948). In 1947, Neumann attended CIAM VI in Bridgewater, England, with a Czech delegation, where he presented planning studies for the Moravian region of Czechoslovakia (other architectural groups with which Neumann was involved at various points in his career include Groupe Espace, Groupe d'Etudes d'Architecture Mobile, Japan Architects Association, and La Société des Architectes de la Région de Québec).

## Biography

---

Neumann immigrated to Israel in 1949, where he initially worked in Jerusalem for the architect and town planner Richard Kaufmann. Between 1950 and 1953, Neumann was employed by the Israeli government to work on regional and urban planning projects (notably for Jerusalem and the town of Beit-Shemesh). In 1952, Neumann became Professor at the Faculty of Architecture, Israel Institute of Technology (Technion) in Haifa. He later became Dean of the Faculty of Architecture and Town Planning (1953-1960) and was awarded the Mary Hill Swope Chair of Architecture (1961). He planned a new curriculum incorporating studies on human biology, psychology, morphology, and ecology in keeping with his researches on the humanization of architecture. In 1956, Neumann published the book *L'Humanisation de L'Espace: Le Système M-Phi*, which principally addresses questions of modular coordination and theories of proportion.

## Biography

---

In 1959, Neumann established an architectural practice with his former Technion students Zvi Hecker and Eldar Sharon. That year he also undertook a round-the-world trip, including visits to numerous cities in India, Southeast Asia, the United States, and Europe. During these later years, Neumann also explored the notion of 'space-packing' systems as three-dimensional arrangements of geometric spatial units. His major projects in Israel include the Bat Yam City Hall and Civic Center, holiday camps at Achziv, Michmoret, and Kiryat Yam, a housing village for Arab refugees at Ein-Rafa, Dubiner Apartment House in Ramat Gan, the Danciger Building for the Faculty of Mechanical Engineering at the Technion, Beit Zayit Youth Camp and Restaurant, and the Synagogue at the Officer's School on Training Base I in Mitzpe-Ramon. Competitions Neumann engaged in during this period include those for Netanya City Hall, the Ashdod City Center, an Auschwitz memorial, and the Amsterdam Town Hall. Many of these projects were considered experimental by Neumann's contemporaries. Neumann's work gained some international exposure during his life through publication of dozens of articles in leading professional periodicals, including *L'Architecture d'Aujourd'hui*, *Domus*, *Architectural Design*, *Zodiac*, *Arts and Architecture*, and others.

## Biography

---

In 1962 Neumann married Naomi Gottesman (1939-1988), one of his students at the Technion. Their daughter Eva-Marie was born later that year. From 1962 to 1963, and from 1965, Neumann taught at the Ecole d'Architecture at the Université Laval in Quebec. Neumann died in Quebec on October 23, 1968.

## Series II: Project Records

### Scope and Contents

Covers Neumann's architectural career, from early and student projects in the Czech Republic, France, and South Africa, to larger-scale projects in Israel. It also includes records for competitions and other unrealized projects, as well as for Neumann's research on space-packing patterns. The series is comprised of four subseries: Drawings, Files, Photographs, and Model. Subseries 1 contains working and presentation drawings, rough sketches, and reproductions. Most are pencil on trace sketches, brown-line drawings, or reprographic copies. Subseries 2 consists of proposals, reports, notes, correspondence, legal documents, and ephemera pertaining to projects. Subseries 3 contains photographs of models, photographs of the buildings in construction, and interior and exterior photographs of completed buildings. Subseries 4 contains an architectural model for an unidentified project. Within each subseries, entries are listed in alphabetical order according to project title.

### Subseries 1: Architectural Drawings

#### Scope and Contents

Contains working and presentation drawings, rough sketches, and reproductions. Most are pencil on trace sketches, brown-line drawings, or reprographic copies. Projects are arranged geographically by country and then city. Projects with no specified location are listed last.

## Series VII: Publications

**Scope and Contents**

Comprised of three subseries: Articles about Projects (Periodicals), Articles about Projects (Newspapers), and Articles about Neumann. The first subseries is the largest and contains articles about and photographs of Neumann's projects, mainly in architecture, engineering, and design periodicals in numerous languages, along with a handful of popular magazines (1959-1971). The second subseries contains articles about projects in Israeli newspapers (mainly in Hebrew). The third subseries contains articles concerning Neumann's architectural career, his influence within Israeli architecture, his role as an educator, and his thoughts on various architectural topics, in both newspapers and architectural periodicals. This last subseries also contains an exhibition catalogue from Harvard, which cites Neumann's projects and research.

**Series IX: Reference****Scope and Contents**

The series is composed of materials Neumann may have used over the course of his researches on space packing, for his various articles, his book *L'Humanisation de L'Espace: Le Système M-Phi*, or for lectures. It contains architecture periodicals, newspaper and magazine clippings on architectural topics, photographs of Brno interiors, academic papers and articles, and the contents of seven slide boxes, which may have been used for Neumann's lectures. The first three slide boxes primarily contain photographs of Neumann's projects. The latter boxes contain personal photographs, images taken from published sources, and diagrams pertaining to Neumann's researches on polyhedral geometry, morphological architecture, and proportion.
